

With Voice Recovery Service you can:

- Regain complete control of incoming calls and faxes
- Rapidly recover from outages

PROTECTION FOR YOUR PHONE CALLS

Introducing the world's fastest, most flexible, and easiest to use Voice Recovery & Business Continuity Service

➤ **If your calls or faxes must get through, you need Voice Recovery Service.**

Rapidly regain control of incoming calls after an outage, with faster and more flexible routing capabilities than any other technology at any price, and a web-based tool that's amazingly easy to use.

➤ **What impact will it have on your organization if you can't answer the phone or receive a fax for 2 Hours, 8 Hours, 2 Days, or 3 Weeks?**

How important is it to be accessible to callers? Every other voice recovery solution either has serious limitations or is prohibitively expensive. Don't let a disaster, or any telecom outage, put you out of business!

There are few disaster recovery or business continuity alternatives for voice services, and those that do exist are often incomplete, ineffective, or extremely expensive. Our Voice Recovery Service can rapidly restore complete control of inbound telecommunications at an affordable price.

- **No equipment to buy**
- **No capital expenditures**
- **No need to change your current local or long distance telephone carriers**

Schedule a 30-minute live demonstration that could one day save your business.
